

Rescue krem za tretman sve 4 faze herpesa na usnama

SoreFix Rescue, krem za tretman herpesa na usnama predstavlja jedinstveno rešenje sa dokazanim delovanjem na sve 4 faze labijalnog herpesa. SoreFix Rescue krem ublažava peckanje (svrab), smanjuje stvaranje plikova, skraćuje vreme zarastanja i sprečava pucanje krase (videti sliku "Delovanje na sve faze"). SoreFix Rescue je providan krem i ne naglašava vidljivost herpesa na usni.

Doziranje i način upotrebe:

Za optimalne rezultate tokom tretmana, naneti krem 3-6 puta dnevno na obolelo područje na usnama da biste sprečili širenje herpesa. SoreFix Rescue se može bezbedno koristiti tokom celokupnog trajanja herpesa, od početne faze peckanja do trenutka kada kresta otpadne i herpes u potpunosti zaraste. Savetujemo da uvek operete ruke pre i nakon nanošenja krema da biste sprečili kontaminaciju. Ukoliko koristite ruž za usne, nanesite SoreFix Rescue najmanje 15 minuta pre nanošenja ruža.

SoreFix Rescue sadrži prirodna ulja bogata vitaminom E. Krem ne sadrži sulfate, polietilenglikole, TEA, DEA, parabene i druge konzervanse.

Mere opreza pri upotrebi:

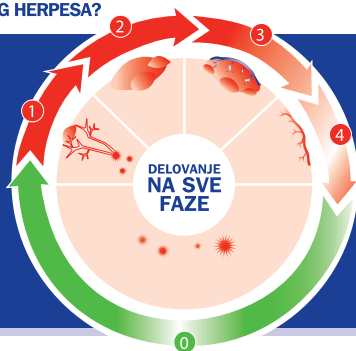

- Labijalni herpes je veoma zarazan. Budite veoma oprezni kada dolazite u fizički kontakt sa bebama i malom decom.
- SoreFix Rescue koristite samo za ličnu upotrebu, da biste sprečili širenje infekcije na druge osobe.
- SoreFix Rescue je namenjen samo za spoljašnju upotrebu na usnama i području oko usana.
- Nemojte koristiti SoreFix Rescue ukoliko ste alergični ili preosetljivi na jedan ili više sastojaka ovog medicinskog sredstva. Odmah prekinite primenu ukoliko se javi iritacija ili alergijska reakcija. Ukoliko simptomi i dalje postoje, obratite se lekaru.
- Ukoliko ste trudni, primenjujte medicinsko sredstvo samo ako Vam ga je preporučio lekar i pod njegovim nadzorom. Koliko je poznato, SoreFix Rescue se može koristiti tokom dojenja.
- SoreFix Rescue je namenjen za odrasle i decu od 4 godine i stariju.
- Obratite se lekaru ukoliko se stanje ne poboljša nakon 2 nedelje i prekinite sa primenom medicinskog sredstva.

Napomena:

Tuba sadrži 6 mL krema. S obzirom da je zbog komformnosti primene tuba veća od svog sadržaja, prilikom prvog otvaranja pažljivo istisnite moguć višak vazduha iz tube.

Rescue cold sore cream for the treatment of cold sores in all 4 phases

SoreFix Rescue cold sore cream is a unique solution with proven efficacy in all 4 phases of a cold sore. SoreFix Rescue cold sore cream relieves the tingle (itch), reduces blisters, shortens healing time and prevents the scab from cracking (see figure "All phases technology"). SoreFix Rescue cold sore cream is a transparent cream to not accentuate the cold sore.

Dosage and use:

For optimal results during treatment, apply the cream 3-6 times a day to the affected area on the lips to avoid spreading of the cold sore. SoreFix Rescue cold sore cream can be safely used during the whole cold sore outbreak, from the initial tingle till the scab has fallen off and the cold sore is completely healed. It is advised to always wash your hands before and after application to prevent contamination. When using lipstick, apply SoreFix Rescue at least 15 minutes in advance.

SoreFix Rescue contains natural oils and is rich in vitamin E. The cream is free of sulphates, free of polyethylene glycols, TEA's, DEA's, parabens and other preservatives.

Precautions for use:

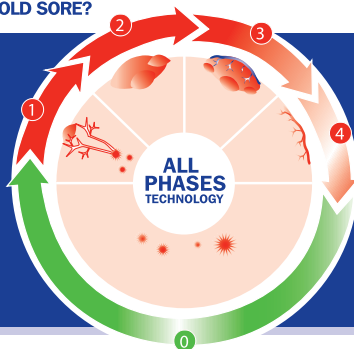

- A cold sore is very contagious. Be extra careful when in physical contact with babies and small children.
- Use SoreFix Rescue cold sore cream only on yourself to prevent infection of others.
- SoreFix Rescue cold sore cream is only suitable for external use on and around the lips.
- Do not use SoreFix Rescue cold sore cream when allergic or oversensitive to one or more of the ingredients. Stop the use of SoreFix Rescue cold sore cream immediately when irritation or an allergic reaction occurs. Contact a health care professional if symptoms persist.
- When pregnant, only use if instructed by, and under supervision of, a health care professional. As far is known SoreFix Rescue cold sore cream can be used during breastfeeding.
- SoreFix Rescue cold sore cream is suitable for adults and children of 4 years and older.
- Contact a health care professional if the cold sore has not improved after 2 weeks and stop using the product.

Note:

To optimize usage comfort, the tube is larger than the actual content. The tube contains 6 ml of the cream. When using for the first time, carefully squeeze possible excessive air out of the tube.

WHAT DOES SOREFIX DO IN EVERY PHASE OF A COLD SORE?

- 0 Inactive cold sore virus
Blocks cold sore triggers and improves the condition of the lips
- 1 Phase 1: Tingling
Relieves the tingle
